REFERENCES PRESENT FOR 15 OF 15 TAXA (100%)

COMPILED 2026-10-15 FROM AROIDPEDIA.COM

Automatically compiled from the References section of every Cyrtosperma species, cultivar and hybrid page on Aroidpedia. Part I lists every source alphabetically with the taxa citing it. Part II lists each taxon with its own references, for readers wishing to dive deeper into a single plant. Part III lists taxa whose pages do not yet carry a References section.
